New Clinical Data using the NvisionVLE® Imaging System to be presented at ACG 2016 and UEGW 2016

Bedford, Mass. – October 15, 2016 – [NinePoint Medical, Inc.](#), a transformative medical device company pioneering the use of an advanced imaging platform for gastrointestinal applications, today announced that new clinical data relating to its proprietary NvisionVLE® Imaging System will be presented at two upcoming major conferences. Eight clinical abstracts will be featured at the American College of Gastroenterology (ACG) conference taking place October 14-19 in Las Vegas, and three podium presentations will be made at the United European Gastroenterology Week (UEGW) conference, which will be held from Oct 15-19 in Vienna, Austria.

“We are delighted to see the expanding body of clinical evidence supporting our focus on helping gastroenterologists find potential disease that may not be visible with conventional medical imaging modalities such as endoscopy or ultrasound”, commented Christopher R. von Jako, Ph.D., President and CEO of NinePoint Medical.

The schedule for clinical presentations related to the NvisionVLE Imaging System at ACG 2016 is as follows:

Date/Time:	Sunday, October 16, 3:30pm – 7:00pm (PDT)
Title:	Volumetric Laser Endomicroscopy (VLE) Can Target Dysplasia at the GEJ/Gastric Cardia in the Absence of Visible Lesions: A Case Series
Location:	P256, ACG Posters Endoscopy, Clinical Vignettes/Case Reports, The Venetian, Exhibit Hall C
Date/Time:	Sunday, October 16, 3:30pm – 7:00pm (PDT)
Title:	Transepithelial Brush Biopsies with Computer-assisted Analysis Improve Detection of Dysplasia When Suspicious Findings Are Identified on Volumetric Laser Endomicroscopy During

- Location:** [Surveillance of Barrett's Esophagus](#)
P292, ACG Posters Esophagus, The Venetian, Exhibit Hall C
- Date/Time:** Sunday, October 16, 3:30pm – 7:00pm (PDT)
Title: [Therapeutic Utilization of In vivo Histopathology in Scleroderma](#)
Location: P333, ACG Posters Esophagus, Clinical Vignettes/Case Reports, The Venetian, Exhibit Hall C
- Date/Time:** Sunday, October 16, 3:30pm – 7:00pm (PDT)
Title: [Hidden in Plain Sight: The Value of Ex vivo Volumetric Laser Endomicroscopy in Confirming Neoplastic Changes Within a Barrett's Nodule](#)
Location: P336, ACG Posters Esophagus, Clinical Vignettes/Case Reports, The Venetian, Exhibit Hall C
- Date/Time:** Monday, October 17, 10:30am – 4:00pm (PDT)
Title: [Volumetric Laser Endomicroscopy Enhances the Confirmation of Complete Remission of Intestinal Metaplasia and Dysplasia in Patients Undergoing Barrett's Ablation](#)
Location: P1050, ACG Posters Esophagus, The Venetian, Exhibit Hall C
- Date/Time:** Monday, October 17, 10:30am – 4:00pm (PDT)
Title: [The Added Value of Volumetric Laser Endomicroscopy in the Detection and Management of Early Stage Esophageal Cancer](#)
Location: P1101, ACG Posters Esophagus, Clinical Vignettes/Case Reports, The Venetian, Exhibit Hall C
- Date/Time:** Tuesday, October 18, 10:30am – 4:00pm (PDT)
Title: [Volumetric Laser Endomicroscopy Complements White Light Endoscopy During Surveillance for Barrett's Esophagus](#)
Location: P1828, ACG Posters Esophagus, The Venetian, Exhibit Hall C
- Date/Time:** Tuesday, October 18, 10:30am – 4:00pm (PDT)
Title: [Volumetric Laser Endomicroscopy Facilitates Identification and Sampling of Advanced Esophageal Histopathology: Results from a Multi-center Registry](#)
Location: P1829, ACG Posters Esophagus, The Venetian, Exhibit Hall C

The schedule for podium presentations related to the NvisionVLE Imaging System at UEGW 2016 is as follows:

- Date/Time:** Tuesday, October 18, 10:54am – 11:06am
Title: [Stepwise development of a Volumetric Laser Endomicroscopy prediction score for Barrett's neoplasia using matched VLE-histology images of endoscopic resection specimens](#)
- Location:** OP217, Barrett's associated neoplasia, Austria Center Vienna, Room L7
- Date/Time:** Tuesday, October 18, 11:06am – 11:18am
Title: [Feasibility of a computer algorithm for detection of early Barrett's neoplasia using Volumetric Laser Endomicroscopy](#)
- Location:** OP224, Accuracy in upper GI endoscopy, Austria Center Vienna, Room L8
- Date/Time:** Tuesday, October 18, 11:30am – 11:42am
Poster Title: [First-in-man pilot study: Feasibility of laser marking in Barrett's esophagus with Volumetric Laser Endomicroscopy](#)
- Location:** OP226, Accuracy in upper GI endoscopy, Austria Center Vienna, Room L8

[About the NvisionVLE® Imaging System](#)

The NvisionVLE Imaging System provides a unique and clinically valuable new perspective of esophageal disease: The ability to image within the wall of the esophagus. By providing a high-resolution, real-time scan of the esophagus using Optical Coherence Tomography (OCT) – a technology similar to ultrasound but using infrared light rather than sound waves - the system enables physicians to view structures not evident with conventional imaging, and potentially identify disease that would have otherwise been missed. With the recent addition of a Real-time Targeting™ feature, physicians can not only locate, but now mark areas of interest. This marking feature, in combination with an improved workflow, enables more accurate targeting, potentially leading to improved diagnosis and more effective therapeutic decisions for patients.

The NvisionVLE® Imaging System has been cleared by the FDA and is commercially available in the U.S. It is indicated for use as an imaging tool in the evaluation of human tissue microstructure, including esophageal tissue microstructure, but providing two-dimensional, cross-sectional, real-time depth visualization and may be used to mark areas of tissue. The safety and efficacy of this device for diagnostic analysis (i.e. differentiating normal versus specific abnormalities) in any tissue microstructure or specific disease has not been evaluated.

About NinePoint Medical, Inc.

NinePoint Medical is a privately-held medical device company that designs, manufactures, and sells an Optical Coherence Tomography (OCT) imaging platform for clinical use in gastroenterology, pulmonology, urology, gynecology, and ENT, for the evaluation of human tissue microstructure. Using proprietary imaging and software technology, the Company is committed to enabling quicker diagnosis of disease and more effective treatments, while reducing the overall cost of healthcare. NinePoint Medical is located in suburban Boston, Massachusetts. For more information, please visit www.ninepointmedical.com.
